

BECOME A ZERO WASTE BUILDING!

WHAT'S ZERO WASTE?

The goal of Zero Waste is to divert 75% of waste materials from landfill, while increasing composting and recycling, by 2025. This contributes to a cleaner environment.

We are at 50% diversion from landfill. Join us in complying with the SB 1383 law and become a leader in sustainability by having a zero waste building.

VALUE OF CENTRALIZED ZERO WASTE BINS

When custodians focus on emptying centralized waste bins instead of individual desk-side bins, they can spend more time on other cleaning tasks.

WHAT WE NEED FROM YOU

If your building's occupants agree to become a Zero Waste building, we will work with you to accommodate adding new bins.
