Sunday response tackles water leak in Chemical Sciences

Kudos to the staff who responded on Sunday, June 28 to address a water leak in the electrical rooms in Chemical Sciences. The plumbing shop and custodial team managed the incident quickly and effectively.

The custodial team dried out the main electrical room and upper-level

mechanical rooms, and the plumbing team brought the deionized water leak under control.

Lead custodians **Glenn Franco** and **Amy Martinez**, along with Sr. Custodian **Angela De La Cruz**, worked together to extract the water and clean up the affected areas. The plumbing

team provided exceptional help, including plumbers **Steve Crook, Jeff Wyrick, Omar Medel, Kevin Sampson, Jesus Guzman**, along with Supervisor **Rich Cordova**. After ordering the needed materials, the plumbers completed the permanent repairs the following Monday morning.

Grounds assists GCAP

On May 27, Landscape Services assisted undergraduates from the Green Campus Action Plan (GCAP), a student group, to complete a campus planting. Students worked with our landscape team to develop a site plan, including which pollinator-friendly plants to use and where to place them. The new planting area sits south of Bourns Hall, between Pierce Hall and the Geology Building—stop by if you'd like to see the new site.

Lead Groundskeeper Jock Thomas and Groundskeeper Martin Urrutia assist GCAP students.
(UCR/John Starling)

Safer lifting and bending through ERGO training

Shout out to HR Assistant & Payroll **Frances Rave** for setting up ERGO training for our staff. Thank you to **Jansen Cunanan**, ergonomic and injury prevention specialist in EH&S, for

leading the sessions. Sr. Custodian **Tony Angulo** and Lead Custodian **Ana Garcia** volunteered to show custodial and building maintenance workers safe techniques for lifting and bending.

Staff attend an ERGO training in the Custodial & Resource Services building.
(UCR/Sandra Martinez)

ORGANIZATIONAL UPDATES

SUMMER REFRESH PROJECT

- This summer, Custodial & Resource Services and Maintenance Services will refresh 30 restrooms and 20 general assignment classrooms. Crews will manage painting, scrubbing, and repairs to keep spaces clean, bright, and well maintained.
