

# PROPOSED SHUTDOWN NOTIFICATION

**DATE** May 21, 2021  
**FROM** Facilities Services  
**TO** Impacted Building Occupants  
**SUBJECT** Proposed Multiple Building Power Shutdown for Monday, June 7th

---

Please be advised a proposed PD&C campus power project will impact various buildings on Monday, June 7, 2021. Please read below for exact details.

**PURPOSE:**

As the campus continues to move forward with an extensive upgrade to our electrical infrastructure, creating more reliability, reducing unplanned outages, as providing flexibility for future growth we will have the following service interruptions (details below). This planned electrical work allows the campus to continue with balancing electrical power across major electrical switches, support the large-scale cabling upgrade underneath the highway for more secure campus connections with the city, eliminate primary power infrastructure immediately adjacent to the freeway, and allow us to have redundancy of campus electrical support in the near future.

Plans to perform these additional electrical infrastructure upgrades are scheduled for **Monday, June 7, 2021 from 7:00 am – 11:00 a.m.**

**Please review the details of the planned interruptions below:**

The following building **will be without power service for the duration of the shutdown.**

Impacted Buildings	
Central Plant (Cooling Towers & Boilers) & Chiller Plant	Recycling Center
Olmsted Hall	University Theatre
Parking Lot 30	

PD&C and Facilities Services staff will be onsite to ensure all power returns to normal.

For more information on campus utility interruptions, view our [Utility Interruption Calendar](#).
